Re: Conners 3—Parent Errata Notice

Dear Valued MHS Customer,

MHS would like to thank you for your loyal patronage throughout the years. We strive to create excellent, innovative products, and provide unsurpassed service to our clients. To this end, we are writing to inform you that an error in the Conners 3—Parent Full-Length QuikScore form (English, French, and Spanish) for the DSM-5 Symptom Count score on the ADHD Inattentive scale has been discovered as follows:

Looking at criterion A1e (item number 84), there is a “2” missing from the column labeled “Required Score Indicated.” That is, there should be both a “2” and a “3” listed in this column, instead of just a “3.” Before scoring, please add a “2” in the Indicated column for DSM-5 Criterion A1e (item number 84). Then obtain the symptom count by following the instructions already provided on the form.

Figure 1a below indicates the location on the QuikScore form where the “2” is currently missing. Figure 1b displays where the missing “2” should be added for correct scoring of the DSM-5 ADHD Inattentive Symptom Count Score.

Figure 1a. Original Form.

The red rectangle below indicates where the missing 2 should appear.

ADHD Inattentive						ADHD Hyperactive-Impulsive					
DSM-5 Criterion	Item Number	Item Score	Required Score		(-)	DSM-5 Criterion	Item Number	Item Score	Required Score		(-)
			May be Indicated	Indicated					May be Indicated	Indicated	
A1a	47			2 3		A2a	98			2 3	
A1b	85			2 3		A2b	93			2 3	
A1c	35			2 3		A2c	89		1	2 3	EITHER item checked
A1d	68			2 3	BOTH items checked	A2c	99		1	2 3	
A1e	84			2 3			A2d	71			2 3
A1f	28		2	3		A2e	54		1	2 3	EITHER item checked
A1g	87			2 3		A2e	45		1	2 3	
A1h	101			2 3		A2f	3			2 3	
A1i	2			2 3		A2g	43			2 3	
Total Symptom Count (sum all checkmarks)						Total Symptom Count (sum all checkmarks)					
<input type="checkbox"/> Age ≤ 16; Symptom criteria probably met if Total Symptom Count ≥ 6						<input type="checkbox"/> Age ≤ 16; Symptom criteria probably met if Total Symptom Count ≥ 6					
<input type="checkbox"/> Age ≥ 17; Symptom criteria probably met if Total Symptom Count ≥ 5						<input type="checkbox"/> Age ≥ 17; Symptom criteria probably met if Total Symptom Count ≥ 5					

Figure 1b. Revised Form.

The red rectangle indicates where a 2 should be added to the QuikScore form for this scale.

## DSM-5 Symptom Counts

**Instructions:**

- For each item number listed below, transfer the circled score from the Scoring Grid into the Item Score column.
- If the Item Score is equal to a number in either Required Score column, circle that number in the May be indicated or indicated column.  
NOTE: Do not circle anything if the Item Score does not match any number in either Required Score column or if the item has been omitted.
- Insert a checkmark in the (✓) column if a score has been circled in either Required Score column.
  - For ADHD Inattentive Criterion A1d, insert a checkmark only if a Required Score has been circled for both items 68 and 79.
  - For ADHD Hyperactive-impulsive Criterion A2c, insert a checkmark if a Required Score has been circled for either (or both) items 69 or 99.
  - For ADHD Hyperactive-impulsive Criterion A2e, insert a checkmark if a Required Score has been circled for either (or both) items 54 or 45.
- Count all checkmarks and write the sum in the Total Symptom Count box.
- Insert a checkmark in the box at the bottom of the table if the symptom criteria is probably met.

NOTE: Please refer to the Conners 3 Manual and DSM-5 Update for exceptions that may alter the Total Symptom Count.

ADHD Inattentive						ADHD Hyperactive-Impulsive
