## Reviews

"In this era of reductionist approaches to mental illness, how refreshing it is to find a research-based and comprehensive volume still committed to the treatment of the whole person. Its rich assembly of chapters demonstrates how Millon's wide battery of inventories can achieve a personalised evaluation that responds to the unique characteristics and concerns of each client in a variety of clinical and applied settings. This book should prove an invaluable resource to clinicians and to instructors who seek to train students in a holistic and personality-based approach to assessment and psychotherapy."
